CATALYTIC ACTIVITY: Protein N-phosphohistidine +
histidine + sugar phosphate.
SUBCELLULAR LOCATION: Integral membrane protein.
SIMILARITY: Contains 1 PTS EIIA domain.
SIMILARITY: Contains 1 PTS EIIB domain.
SIMILARITY: Contains 1 PTS EIIC domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         FUNCTION: This is a component of the phosphoenolpyruvate-dependent sugar phosphotransferase system (PTS), a major carbohydrate active transport system. The IICD domains contain the sugar binding site and the transmembrane channel; the IIA domain contains the primary phosphorylation site (the donor is phospho-HPT); IIA transfers its phosphoryl group to the IIB domain which finally transfers it to
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   sucrose and .0.";

CATALTYIC ACTIVITY: Protein N-phosphohistidine histidine + sugar phosphate.

SUBCELLULAR LOCATION: Integral membrane protein SIMILARITY: Contains 1 PTS EIIB domain.

SIMILARITY: Contains 1 PTS EIIC domain.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            and the transmembrane channel; the IIA domain contains the primary phosphorylation site (the donor is phospho-HPr); IIA transfers its phosphoryl group to the IIB domain which finally transfers it to the sugar.

D 099R00

C 099R00

JT 01-JUN-2001 (TrEMBLrel. 17, Created)

DT 01-JUN-2001 (TrEMBLrel. 17, Last sequence update)

DT 01-JUN-2001 (TrEMBLrel. 26, Last annotation update)

DT 978 system, sucrose-specific IIBC component.

GN Name-scra; OrderedlocusNames-SAV2377;

OS Staphylococcus aureus (strain Mu50 / ATCC 700699).
